

Teacher Note

Teachers are no strangers to summer learning loss. After all, you're the ones who have to spend the first several weeks of school reviewing material that was already learned in the previous year. We'd like to help you out with that.

Summer Solutions effectively combats summer learning loss by systematically reviewing all concepts learned over the course of the year using distributed practice, a learning strategy supported by over 100 years of research.

At \$12 per book, *Summer Solutions* is a budget-friendly series for parents who want to keep their kids sharp. We urge you to recommend *Summer Solutions* to your students' parents. Page 2 of this document is a convenient form that can be handed out to parents on an individual basis. You may recommend certain books for each child, or you may simply highlight the books you expect all students to complete over the summer. In schools that choose to make summer learning mandatory for their students, the entire workbook is usually submitted the following fall and is used for the first grade of the year.

Thanks for using *Summer Solutions*!

(Note: Students should use the *Summer Solutions* books for the grade level just completed. For example, if the student has just completed the third grade, he or she should use third grade *Summer Solutions* books.)

Dear _____

Studies show that during summertime, students can forget two months worth of the reading and math skills they've learned during the school year. Our class is doing its best to keep sharp over the summer months, so I am recommending *Summer Solutions* workbooks. These workbooks will review what we've learned and prevent learning loss. They can be ordered at www.SummerSolutions.net.
